

In the Spring of 2015, we ran a class called “Design & Me” at Stanford’s d.school. The class helped students intentionally reflect on what they learned about themselves by taking a d.school class, learning about the design thinking process and being part of a team. The class was an hour long and was held once a week for 6 weeks.

The idea for the class arose after empathy work done with students in the d.school about learning styles and personalities. One of our most exciting findings was that students who intentionally reflect throughout their classes feel like they benefit most from their experience.

In this document are the curriculum and worksheets from that class. While this class was designed with the Stanford d.school in mind, we hope that the exercises in this booklet can provide inspiration for any teacher working with team-based projects.

Week 1 Curriculum

Objective :

1. Get to know each other
2. Reflect on your strengths

Activities:

1. Build notebooks
 • Enter on action
2. Getting to know each other drawings:

Who am I?

Why am I at
the d.school?

Why am I in
Design & Me?

3. Strengths Cards (see next page)

Challenge for the week:

- Talk to at least 3 people and ask them about what they see as your strengths.

What are you
good at?

What are you
good at?

What are you
good at?

What do you
enjoy doing?

What do you
enjoy doing?

What do you
enjoy doing?

What do you
spend a lot of
time doing?

What do you
spend a lot of
time doing?

What do you
spend a lot of
time doing?

Why or why not? What more would you add?</i></p>

Draw something you learned about yourself this week.

When we get together on Thursdays.

Draw or write down your intention for the next week.

Before you head out.

Think of a time you set an intention for yourself: What worked?
What didn't? How would you approach it differently next time?

During the week at home.

Week 2 Curriculum

Objective :

1. Considering your strengths, what might you consider developing?
2. Make an actionable goal for your week to work on 1

Activities:

1. Create a map of your intentions to help determine which skill to develop
2. Design project with a partner:
 - Ö Empathy work: what does your partner want to develop?
 - Ö Ideation: how might your partner work on that still |?
 - Ö Prototype/test: choose from your partner suggestions and commit to that challenge for the week

Sample Self-determined Challenge :

- Have at least 1 challenging conversation with team members who frustrated with. d

Draw something you learned about yourself this week.

When we get together on Thursdays.

Draw or write down your intention for the next week.

Before you head out.

In designing for someone else, what did you learn about yourself?

Draw something you learned about yourself this week.

When we get together on Thursdays.

Draw or write down your intention for the next week.

Before you head out.

Think about tools or exercises you've learned and used in your school classes. Can you think of one that has been particularly helpful for you and why it was helpful?

Week 4 Curriculum

Objective :

1. Share tools that you have learned in class that have been particularly helpful

Activity :

1. Public share out of the tools that they had thought about from last week & reflection sheet

Sample Tools that we re Share d:

- Consider the opposite: consider features of the system/think you are designing around and think about the opposite
 - o eg.. Public transportation: Stinky → Smells like a princess
- Design Principles: After gathering & analyzing data, come up with at least 5 statements that a solution should include
- Think of empathy work as a set of experiments
- Best ideas/worst ideas: Hand your worst ideas to another group and they have to turn them into worthwhile ideas
- Defining Points of View: Write a Point of View on your board. Rotate around to other groups' boards and write how might we statements for their Points of View

Draw something you learned about yourself this week.

When we get together on Thursdays.

Draw or write down your intention for the next week.

Before you head out.

How has this quarter been so far? What do you hope to keep the same in the remaining weeks? What do you hope to change?
